

Fold din egen julestjerne

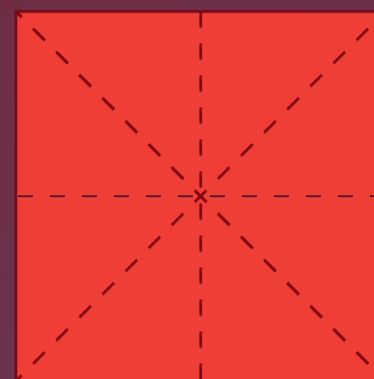

1 Lav et kvadratisk papir ved at folde et hjørne helt ned til den ene side. Klip det overskydende papir af

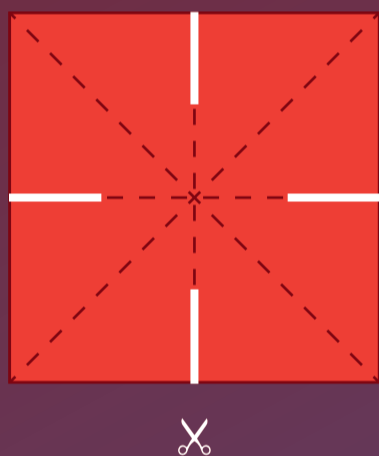

2 Fold diagonalt på den anden led og fold papiret ud igen

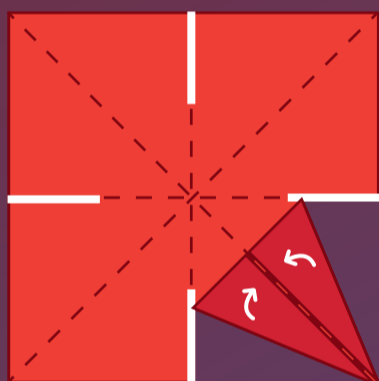

3 Fold på midten på begge led

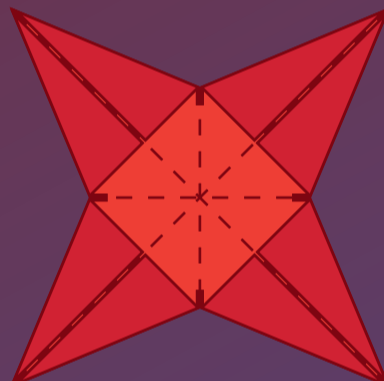

4 Fold papiret ud igen

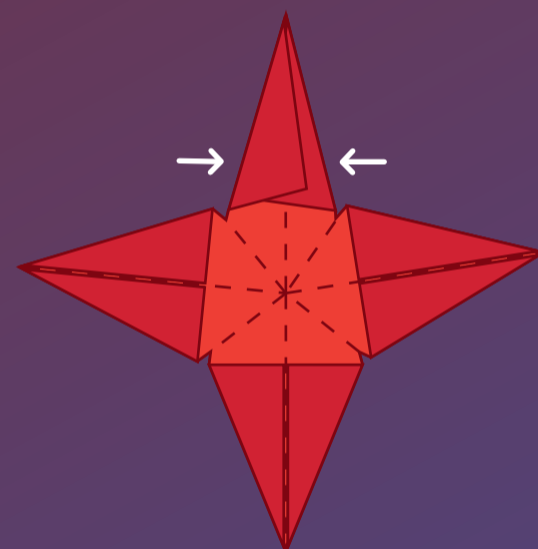

5 Klip op til halvdelen af midterfolden

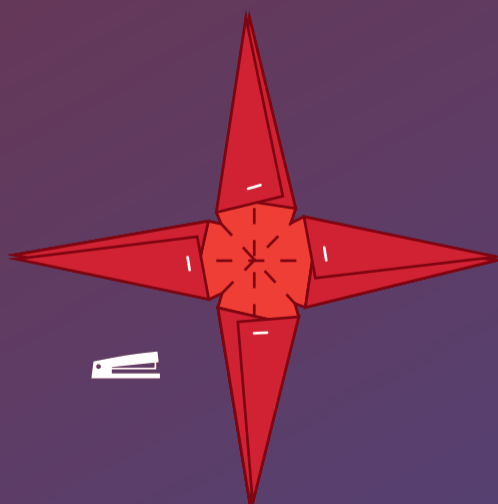

6 Fold snipperne ind til midten af diagonalfolden

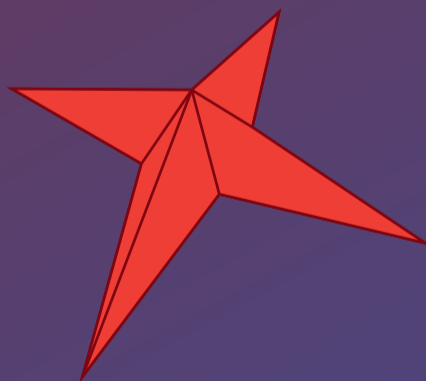

7 Fortsæt hele vejen rundt til alle fire spidser er foldet ind

8 Saml flapperne henover hinanden, så stjernen bliver tredimensionel

9 Klips de to lag flapper sammen

10 Så er første halvdel af stjernen færdig. Gentag trin 1 - 9 og lav endnu en halvdel

11 Saml de to halvdele med dobbeltklæbende tape eller limpistol

12 Sæt en snor i en af spidserne og klap dig selv på skulderen
